

PETITION TO EXPAND POSSIBILITIES FOR THE PAN & FORK PROPERTY AS DESCRIBED BY THE
DAAC

We, the undersigned, believe that the Lowe Enterprises proposal to develop the Pan & Fork property now under discussion in Basalt should be delayed until further review and discussion can occur in our community.

We, the undersigned, believe in and support the vision and guiding principles of the Downtown Area Advisory Committee's Final Report. The Lowe Enterprises proposal does not follow these in any recognizable way. Those guiding principles are:

- Connect the Town to the Rivers;
- Preserve significant physical and visual access to the Rivers;
- Improve Lion's Park;
- Allow density to drive revitalization;
- Provide a "There-There" destination for residents and guests alike.

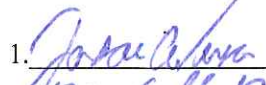

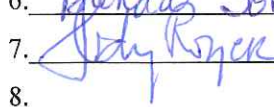

We believe further community review and discussion of the guiding principles must occur and be adopted into a framework before proceeding with any development proposal.

We believe Basalt has an extraordinary opportunity in the Pan & Fork parcel that must be thoughtfully considered as a legacy for the town in three generations, five generations, seven generations.

We realize the community *has just now* been given the opportunity to see the river and the property and we believe we must explore all possibilities that will enhance Basalt's small town character, its river access on all levels, physical, visual, psychological and spiritual with expanded vitality and sustainability.

We the undersigned believe that art, events, and soul create vitality.

We urge the Basalt Town Council to actively seek proposals that honor the Our Town Planning Process and recommendations of the DAAC and bring new ideas to the forefront of our town.
