Subject: CDC River Parcel

Hi All,

Thank you for serving our community in your present roles with the Town of Basalt.

I would like to endorse a movement from the Common Sense Community Vision for Public Option A regarding the use of the CDC River Parcel.

It appears to be a reasonable approach for the town to secure a well rounded use of that precious space.

When it was put to discussion in 1994 with the Town Board, we discussed a similar theory of mixed use with an element of affordable housing.

Please do not turn it over to a large scale monster developer. There are plenty of those examples just down the road.

Keep downtown eloquent and inviting.

Thank you,

Lisa Robbiano
